

November 27, 2017

Our firm selected United Building Solution as the General Contractor for a 10000 ft<sup>2</sup> addition, to include cold storage, to our complex. This was the second project United performed for us.

We have just moved in, and it is more evident than ever that the building exceeds expectations. It was a well-run, professional operation.

While not a builder myself, I believe one of the greatest compliments in the trade is 'on schedule and within budget'. United delivered.

Our business plan calls for future expansion once again, and United Building Solution will most definitely be on the short list of contractors for our upcoming builds.
